GLOWSTONE BEYOND ELEGANCE

Premium Luxury Quartz Surfaces Made In India

Glowstone is an eco friendly production house producing beautiful engineered artificial quartz. We offer a wide range of designed quartz surfaces with the finest quality and premium surface finish.

Our surfaces are used for virtually any interior surface, countertops, vanity tops, table tops, wall panelling and commercial interiors.

With the state of the art machinery and quality control, our main aim is to provide our customers with the best features, design and characteristics.

WHO ARE WE?

OUR VISION

Kitchen Slab Culture

Glowstone evolves its range of surfaces to conquer the most demanding and innovative designs. Quartz slabs represent a natural and safe evolution, they coordinate our aesthetics and great flexibility, to offer new spaces dedicated to compliment the modern living.

Diverse Demand Of Clients

Glowstone Quartz Surfaces catering to diverse demand of clients across the Globe respecting delivery deadlines and honouring its customers with quality products. The wide product range is available in slabs, and cut sizes with different style, size and finish.

DESIGN INSPIRATION

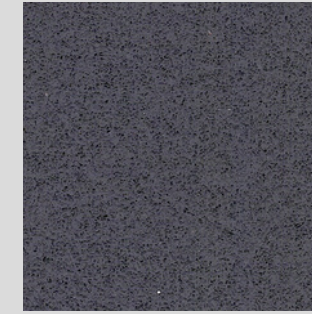

Quartz is one of the hardest minerals in nature, with a high level of resistance. It is crystallised silicon dioxide (SiO₂), which is usually white or transparent and can be found in other colours if it comes into contact with impurities during its formation.

EDGE PROFILE

46

Half-Bullnose.

An edge that is rounded along the top and flattens at the bottom for a straight edge while maintaining a consistent thickness. Also known as half-bullnose.

Ogee.

This traditional style edge features a concave arch that transitions into a convex arch.

Basic Eased.

This edge type appears square with a slightly eased top edge while maintaining the surface's thickness.

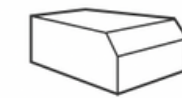

Mitred.

This edge joins two angled pieces to give the visual effect of a thicker surface.

Bullnose.

A completely rounded finish that maintains the surface's thickness.

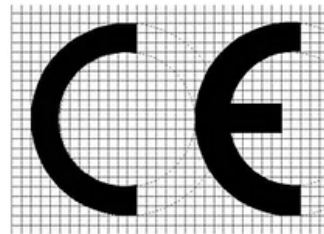

Straight Beveled.

Similar to the basic ease, this edge maintains the surface thickness and appears square with a slanted top edge.

WHY US?

Glowstone

Glowstone Quartz Surfaces are 93% pure natural quartz and 7% polymer resin. The debonair appearance provides the feel of natural stone but with an unbeatable quality and panache. Each of Glowstone's Quartz Surfaces, is non-porous, homogenous and highly durable. It is resistant to scratches, stains and is virtually maintenance free.

Glowstone Quartz Surface is coloured using finest quality unleaded colorants which ensure homogeneity and evenness in colour. The secret behind Glowstone Quartz Surface groundbreaking material strength and its beauty lies in its high-purity quartz, a binding polymer.

Glowstone Quartz Surface makes it possible to create anything from beautiful kitchen worktops to the modern flooring and cladding. The surface can be structured with the endless possibility of adding variety of customized aesthetic elements like recycled glass or mirror chips, siliceous metal, pearls giving Glowstone Quartz Surface an urbane and matchless visual appearance.

Clearly, there are plenty of reasons people like quartz countertops. However, functionality and appearance are not the only considerations. Sustainability is also important. After all, your countertops do more than change the look of your home. The production, manufacturing and installation of your quartz countertops can leave an impact on the environment.

SUSTAINABILITY

When looking at the sustainability of quartz, one of the key factors is its availability!

Quartz is easily accessible in nature and is also easy to mine. Accordingly, there are many local mines in our region making our quartz travel from nominal distances, reducing the environmental impact to boost sustainability with a **lower carbon footprint**, ultimately makes Glowstone Quartz more **environmentally conscious**.

The sustainable advantages do not end here! When processed, quartz does not need special handling, therefore, fewer pieces are damaged or lost leaving a minimum wastage. Glowstone Quartz Surfaces are processed using **95% of recycled water** along with **75% of Solar Energy**.

Another benefit is the durability. Quartz endures longer than many other materials and this means that it does not need to be replaced as often!

A two-tier copper wire basket containing artichokes on the bottom tier and other vegetables on the top tier.

A folded white and beige striped kitchen towel.

A large, round wooden cutting board leaning against the wall.

A small glass vase containing white flowers and white pebbles at the bottom.

A glass jar of salt with a black label that reads "SALT OF THE EARTH. PINK HIMALAYAN SALT".

A bottle of sesame oil with a black label that reads "DIPASA SESAME OIL PREMIUM REFINED SESAME OIL 16 FL. OZ (500 ML)".

A round wooden butter dish with a lid and a string tied around it.

CARE & MAINTENANCE

Glowing Forever

Those who value beauty, luxury and durability for their home decor, Glowstone is the right choice. Glowstone, an engineered Quartz stone, reflects strength of Quartz and style of exclusive granite.

Cooking Grease

When grease from cooking is an issue, use a basic degreasing product, to help loosen and remove the grease from the surface. Always follow the product manufacturer's instructions for use.

High-pH Cleaners

Casual exposure to alkaline solutions will not damage Glowstone surfaces. Highly alkaline (high pH) cleaners, such as oven cleaners and concentrated bleach, are not recommended to be used on Glowstone surfaces.
